Heroku

👤 PROFILE

I'm an experienced React engineer that is focused on building scalable applications with the latest web technologies.

📁 EMPLOYMENT HISTORY

Senior React engineer at Pennylane, Remote

October 2021 — Present

- Develop new features on a [React fintech app](#) that has large user base and high availability. Improve the components UI library
- Write tests (react-testing-library), monitor endpoints (Datadog), track user events (Segment), create app usage dashboards (Metabase)
- Review PRs and work in an Agile / Shape Up Method
- Assess technical complexity and coordinate different projects

Co-Founder and React engineer at QuickBrains, Remote

November 2019 — Present

Quickbrains is a small outsourcing agency where I built the frontend side of the projects. A complete description of those projects can be found [here](#).

React engineer at Syneto, Remote

May 2019 — September 2021

- Worked on the implementation of an open-source UI React [component library](#), based on company's UI/UX design system. The library is used on all the company's React projects.
- Estimated and developed features on 2 React projects (one of them was started from scratch), based on UI/UX specifications
- Worked on a frontend project built only with ES6, Javascript Lodash Templates and Bootstrap. Objective is to slowly move it to React.

Full Stack Developer at Visma, Timisoara

September 2015 — May 2019

- Migrated the Rails frontend app from ERB templates to React/Redux
- The React app was integrated in different finance ERPs using iframes and supported custom designs
- Developed backend features for the Rails app & Grape API (2 years)

Junior SDET / Cloud engineer at Cloudbase Solutions, Timisoara

January 2014 — September 2014

Intern Software Developer at Intel Movidius, Timisoara

July 2013 — October 2013

🎓 EDUCATION

Bachelor's degree in System Engineering, Politehnica University of Timisoara, Timisoara

September 2012 — September 2016
